DETAILED ACTION

Allowable Subject Matter

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the prior art alone or in combination does not teach the limitation of the varactor wherein a portion of a top surface of the tunable dielectric material positioned above the gap opposite the surface of the substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

The applicant has argued that Muller and Rutt are silent with respect to the varactor wherein the a portion of a top surface of the tunable dielectric material positioned above the gap opposite the surface of the substrate. The examiner finds this argument persuasive therefore, the examiner made a decision to allow these limitations over the prior art record.

Citation of Relevant Prior Art

Art Unit:

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Dimos et al discloses a tuneable dielectric films having low electrical losses.
- b. Koscica et al discloses a thin film ferroelectric varactor.
